

Snippets and Tips.

Following good rains Marloth is looking green and lush, but much of the greenery is not edible for our animals. We still need to ask property owners to continue the planting of grass seed.

Alien plant removal is going well with the help of many people. However, much still needs to be done. We can advise owners as to which plants to remove from their property.

Easter will soon be upon us with the influx of many visitors who we sincerely hope have a wonderful time in our beautiful place.

Please would homeowners assist us by advising guests not to hand feed the animals. Although they may appear tame, they are still wild. Some instances observed are: Feeding Zebra while standing in a group of the animals, handfeeding Ostrich and allowing children to attempt to feed Warthog that have piglets. Feeding of Primates should not be done at all as Baboons and Vervet Monkeys become extremely aggressive over time. They could attack and seriously injure someone. There have already been instances of aggressive behaviour by baboons towards people in Marloth Park.

Please visit our Stall at the Easter Fair at Marlothii Trading Post. See our exhibits and we will gladly help you with any queries you may have.

Brokkies en Wenke.

Na die goeie reën lyk Marloth groen en welig, maar baie van die groenigheid kan nie deur ons diere gevreet word nie. Ons vra nog steeds dat grond eienaars sal aanhou op gras sade te plant.

Die verwydering van uitheemse plante gaan goed met die hulp van baie mense, maar daar is nog baie werk wat gedoen moet word. Eienaars kan ons gerus kontak indien hulle advies nodig het vir watter plante verwyder moet word.

Paasfees gaan binnekort met ons wees en dit gaan gepaard met 'n instroming van baie besoekers. Ons hoop van harte dat hulle 'n wonderlike tyd in ons pragtig dorp gaan geniet.

Ons versoek huis eienaars om ons te help deur nie toe te laat dat gaste die diere met die hand probeer voer nie. Selfs al lyk hulle mak, is dit nog steeds wilde diere. 'n Paar voorbeelde wat ons al opgelet het is die volgende: Om Sebras te voer terwyl die diere mense omring, pogings om volstruise met die hand te voer en om toe te laat dat kinders probeer om vlakvarke te voer wat kleintjies het. Die voer van bobbejane en ape word ten sterkste afgekeur omdat hierdie diere met die tyd verskriklik aggressief word. Hulle kan mense aanval en baie ernstige beserings veroorsaak. Ons het alreeds kennis geneem van bobbejane se aggressiewe gedrag teenoor mense in Marloth Park.

Kom kuier gerus by ons stalletjie tydens die Paasfees mark by Marlothii Handelspos. Kyk na ons uitstallings en ons sal graag help met enige navrae.
